

3 Easy Steps to Start Streaming With BoxCast

1. Set Up Your Encoder

- Click **Set Up Your Encoder**.
- You will then be provided with your *RTMP URL*, *server URL*, and *stream key*. These codes are unique to your account and will remain the same. Once you put them in your encoder, you shouldn't have to do it again.
 - *Note: Terms may differ depending on the type of encoder you're using. Read our FAQ for more information.*

For more information on setting up your RTMP destination, [click here](#).

2. Schedule Your First Broadcast

- Fill out the **Schedule Broadcast Details** page and hit **Schedule a Broadcast**.
- If you're using an RTMP encoder, you must have a scheduled broadcast in the BoxCast Dashboard or you will get an error. For best results:
 - Schedule the broadcast in the **BoxCast Dashboard**. This could be hours, days, or months ahead of time.
 - 10–15 minutes before the broadcast is scheduled to go live, hit the **Stream** button on your encoder. This will start sending data to our servers so the broadcast can go live on time.
 - When you're done with the broadcast, we recommend stopping it in the BoxCast Dashboard and then stopping it on your encoder.

[Click here](#) for more detailed instructions on scheduling your first broadcast.

- You can also set up recurring broadcasts so you don't have to manually schedule yours every week. [Read this article](#) to learn how.
-

3. Import Your Videos

- Make sure your videos are **Public** in Sunday Streams.
- BoxCast will automatically import your videos from the last 30 days of your Sunday Streams account. We'll also give you the option to select other broadcasts you want to bring over.
- Please be patient – the importing process could take up to 24 hours to get all videos on your account.
- We offer free unlimited storage for 90 days.
 - *Note: You will be charged for broadcasts that are active in your account for longer than your free storage duration. Learn more about our storage policy [here](#).*
